

# LAYER LIKE A STYLIST

## 6 TIPS FOR FLAWLESS NECKLACE STACKING

### Less Is More

Three's company. Four's a crowd. When it comes to necklace stacking, the magic number is three. Layering more than three necklaces can feel chaotic and heavy. Instead, choose two or three complementary pieces that give your neckline room to shine.

### Start at the Top

Shortest Necklace = Foundation. Your top necklace sets the tone for your stack. Choose a flattering length that complements your neckline and frame-it becomes your anchor piece for building up or down.

### Mind Your Chain Types

Mix it up-but mind the balance. Play with texture and chain thickness, but make sure each piece has a purpose. Let your statement necklace land at the top or bottom, and keep the middle clean and simple to avoid clutter.

### Add a Pop of Color

Make it pop! A colorful pendant or bright accent near your face draws attention to your best features. This is especially striking against a neutral outfit or when you want to bring some energy to your look.

### Play With Shapes

Shape shifter. Combine bold shapes, sweet details, and playful pieces for a layered look that feels fresh. Think chunky hearts with dainty chains, or pair a bold pendant with a row of tiny beads for contrast.

### Go Dainty for Dressy Looks

Subtle stacks for fancy days. For formal wear, keep your stacks minimal and delicate. A choker paired with a long lariat or fine chain adds elegance without overpowering your outfit.
